

Water Washable Resin

Technical Data Sheet

Can be washed with water, saving step for alcohol cleaning, greatly shortening the post-processing time, improving printing efficiency and cost-effective. The molding precision is high, with high resolution, the surface of the printed product is smooth, and the printing details are clearly visible. The mechanical properties such as strength, toughness and rigidity are balanced. Low viscosity, high release rate, easy to print.

Material Status	Mass Productior	1		
Characteristics	WashableLow viscosityHigh precision		• Balanced strength, toughr	ness and rigidity
Applications	EducationGarnish			
Appearance	• Multiple Colors			
Form	Resins			
Processing method	• (surface exposure molding) LCD			
		Testing method	Туріса	value
Physical Properties				
Density		GB/T 4472	1.10-1.14	ł g/cm³
Viscosity		GB/T 22235	110-180	mPa•s
Hardness		ASTM D2240	74-82	Shore D
Mechanical Properties				
Tensile Strength		ASTM D638	19-46	MPa
Elongation at Break		ASTM D638	17-30	%
Flexural Strength		ASTM D790	15-50	MPa
IZOD Impact Strength		ASTM D638	37-97	J/m
Thermal Properties				
Heat distortion Temperature		GB/T 1634	N/A	°C

Recommended printing parameters

Settings	Low Light Intensity	Medium Light Intensity	High Light Intensity (Monochrome LCDScreen)		
Representative Machine	AnyCubic	eSUN LCD 3.0	Anycubic MONO X		
	Photon	Nova Bene 4	ELEGOO Saturn		
		Creality LD-002R	Phrozen Sonic Mini		
Exposure Time/s	8-10	5-6	Not recommended		
Bottom Layer Count	3-5				
Bottom Exposure Time	40-60	30-40	Not recommended		
Lifting Distance/mm	5.5&6-inch screen	5-6or Higher 8.9&13.3-inch sc	reen: 8-12or Higher		
Lift Speed/mm•min-1	90-150	90-120	Not recommended		
Retract Speed/mm•min-1	150-200				

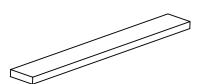

1. The above parameters are for reference only. The performance of the cured material will be affected by factors such as equipment, environment, parameter settings, post-processing methods, detection methods, etc., which will cause big differences. Please contact us if necessary;2. Shake the resin well before use; please recycle the resin in time after printing; avoid prolonged soaking of the molded parts in the cleaning agent;3. It is not recommended to add other ingredients or mix them to the resin to avoid molding failure or other problems;4. The resin should be stored in a cool, dark place, and sealed with an opaque container;5. The photopolymer resin is made of chemicals, which has a certain odor and skin irritation. Pay attention to protection during transportation and use. If the resin accidentally touches your skin or eyes, please rinse with plenty of water, and the skin can be cleaned with detergent, decontamination powder, etc.; if the allergic reaction is severe or even enters the mouth or nasal cavity, please seek medical attention immediately;6. The model should be printed at a room temperature of 25-35 degrees. IF it is winter, it is recommended to turn on the air conditioner for printing.

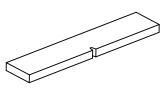

Matters needing attention

1. Shake well before printing2. The water washable resin should not be washed for a long time. It can be tens of seconds to one minute. After washing, please use a hair dryer to dry it in time. When storing, be careful not to place it in a humid and high temperature environment.

Mechanical Properties

Tensile testing specimen ASTM D638

Flexural testing specimen ASTM D790

IZOD Impact Strength ASTM D638

The physical properties, mechanical properties, and thermal properties of the resin are obtained based on the printing spline test.
